Nov 2022 - Mar 2023

Beetroot Academy  
Front-End Developing

Jun 2022 - Nov 2022

Zaporizhzhia National Technical University  
Faculty of transport, Organization of transportation

## Languages

Ukrainian: Native  
English: Pre-Intermediate (A2)

## Summary

I have almost 2 years of commercial experience in Frontend development, during which I have worked extensively with **HTML, CSS, JavaScript and Vue.js/Nuxt.js framework**. I specialise in developing projects of various sizes, focusing on creating new landing pages and components, implementing the necessary logic and functionality, and working with existing codebases. During the development of landing pages:

- optimized the development process, increasing speed by 50%
- developed a landing page that improved conversion rates by 20%

I worked on projects related to a social networking platform and a financial platform (fintech). During the development of a financial platform:

- took full responsibility for the frontend development
- led a full platform redesign, which contributed to attracting investors
- rewrote the routing system, significantly improving platform performance

In my chosen field, I find inspiration in the opportunity to continually develop and refine my skills, ultimately aiming to deliver maximum value to the business.

## Portfolio

Link to my portfolio-site:
