# Evgen Vittsenko
Frontend Developer

## Summary

*I have almost 2 years of commercial experience in Frontend development, during which I have worked extensively with HTML, CSS, JavaScript and Vue.js/Nuxt.js framework. I specialize in developing projects of various sizes, focusing on creating new landing pages and components, implementing the necessary logic and functionality, and working with existing codebases.*
*I worked on projects related to a social networking platform and a financial platform (fintech).*
*In my chosen field, I find inspiration in the opportunity to continually develop and refine my skills, ultimately aiming to deliver maximum value to the business.*

## Professional Experience
